¹ A High-Risk Premise is defined by the RI Department of Health as a property where three or more children younger than six years old and at least half of the total number of children tested while living at the premise have been [significantly lead poisoned](#).

² Notices of Violation are issued by the RI Department of Health to property owners whose units contain lead hazards and remain without Certifications of Lead Safe status

³ Notices to Abate are issued by the RI Department of Health to properties that have been inspected and contain lead hazards that should be corrected.

⁴ Includes child care centers, preschools and elementary schools.
